THE PERFECT EMOTION IN BATHROOM

Welcome

Kartell + Laufen: emotion in lifestyle

Kartell Company
Milano, Italy

Laufen Company
near Basel, Switzerland

A complete bathroom project inspired by the iconic design of Kartell together with the quality of Laufen.

It's a new dialogue.

And despite involving semantically opposite universes, it is based on agreeing on a word.

A concept. This is the key that opens all design doors, as well as those for fashion and architecture. Excitement. This is the pass-key that brought together the iconic culture of Kartell's design and the innovation and quality from Laufen.

An integrated research project that redefines the principles, shapes, and uses of what is an ever more important space in life today: the bathroom.

Their collaboration is also a com-penetration.

Because in the world that is taking shape "we" is more important than "I". And it does not stop at pronouns. Rather, it means having a strategy that valorises the skills to deal with the complexity of demand that is ever more diversified, layered, and often anaesthetised by too much uniformity in terms of what is on offer - because it is dulled by excessive beauty or functionality that either way, overlooks how important continuing to be excited really is. Every day. That was behind the choice to entrust a project this important to the two best bathroom designers, the multi award-winning Ludovica+Roberto Palomba, to come up with something completely new using a material that, until very recently was merely a dream - SaphirKeramik. The result of lengthy techno-eco-logical research by Laufen, twice-as-strong, more ecological and thinner than ceramic. Stunning performance, granted; but also necessary in a society aiming at reducing consumption, that loves simplicity, and that is looking for a dynamic relationship with sensual pleasure.

The result is clear to see – ceramics with thin, almost live edges, the grooves in (solid surface Sentec) baths that house LEDS for chromotherapy,

surfaces treated with enamels in sophisticated colours, drain outlets that are invisible, hidden below essential slots, and assembly systems that are as innovative as they are easy.

Then there's the monumentality, transparency, and purity of the elements, that take an ideal view of architectural volumes, while projecting these objects onto an exceptionally light horizon.

This lightness is accentuated by dialogue with the chunky, elegant and transparent plastic of furnishing accessories: stools/side tables, stackable units, shelves, mirrors and lamps. Just like phrases for effect in a conversation overall, they stand out for their irony. They are nomadic, versatile.

And depending on their colour they change the mood of the bathroom, just like accessories change the conception of a garment: blue adds the strength of serenity, tangerine orange gives a sun-like accent, amber adds body, smoky ink outlines profiles like eye liner, while full-on white and black are structurally imposing compared to the transparent lack of structure.

And it is in the texture of the background, always changing, that the stage of emotions finally becomes complete.

Feelings that change like bathroom styles change – interior space par excellence that has to then be adapted to the various personalities, while maintaining design coherency. Just like dialogue between opposite poles: lightness and weight, play and rigour, eclecticism and minimalism. Functional binomials of modern-day creativity, just like the two brands, Laufen and Kartell.

Now joining forces in a shared project that is a tribute to innovation and iconicity.

Federico Chiara — Vogue Italia

Washbasin + vanity unit combination 80
with feet – slate grey
Washbasin mixer

Stool 'Max-Beam'
Mirror 'All Saints'

– transparent crystal
– silver

Deep grey

A tall, white, minimalist cabinet stands against a dark background. On top of the cabinet, there is a small lamp with a faceted glass shade and a vase containing several thin, dark sticks. The lighting is dramatic, highlighting the cabinet's clean lines and the textures of the objects on top.

Tall cabinet door right

Just like a dialogue between
opposite poles: lightness
and weight, play and rigour,
eclecticism and minimalism.

Slim

LAUFEN RIMLESS WC

The bowls of the LAUFEN rimless WCs have no rim. There's no longer anywhere for dirt and deposits to hide; instead, thanks to an innovative and powerful flushing system, everything's flushed cleanly away with both the 6/3 litre and the 4.5/3 litre version. Both public toilets and private bathrooms can benefit from the easy cleaning and great hygiene of this system.

Die LAUFEN rimless WCs kommen ohne einen Spülrand aus. Schmutz und Anhaftungen finden hier keine Nische mehr, sondern werden dank eines innovativen, kraftvollen Spülsystems sowohl bei einer 6/3-Liter als auch bei 4,5/3-Liter-Spülung sauber weggespült. Von der vereinfachten Reinigung und dem Plus an Hygiene profitieren nicht nur öffentliche Sanitäranlagen, sondern auch Privathaushalte.

I vasi LAUFEN rimless sono senza brida. In questo modo lo sporco e le incrostazioni non possono più aderire, ma vengono eliminate perfettamente grazie ad un sistema innovativo di potente risciacquo, sia da 6/3 litri che 4,5/3 litri. La maggiore semplicità di pulizia e la maggiore igiene sono vantaggi importanti non solo negli impianti sanitari pubblici, ma anche in quelli domestici.

Les WC LAUFEN rimless fonctionnent sans bride. La saleté et les incrustations n'adhèrent plus, elles sont tout simplement rincées par un système de chasse d'eau puissant avec un volume de 6/3 litres ou 4,5/3 litres.

L'absence de bride simplifie le nettoyage et assure une hygiène irréprochable, aussi bien dans les espaces publics que dans les espaces privés.

Saphir

A REVOLUTION IN THE FORMAL
LANGUAGE OF CERAMICS

The innovative and high-quality composition of SaphirKeramik bestows possibilities and versatility never seen before upon the base material, enabling exceptional shaping. Edge radii of 1–2 mm are thus technically feasible.

The new type of ceramic is considerably harder and has an improved bending strength. LAUFEN is thus able to produce thinner ceramic bodies, which reduces weight and the consumption of raw materials and energy. SaphirKeramik is not a replacement for any of the existing materials; instead, it broadens the range of forms of expression of the natural base material.

EINE REVOLUTION IN DER
FORMENSPRACHE VON KERAMIK

Die innovative und wertvolle Rezeptur von SaphirKeramik gibt dem Ausgangsmaterial noch nie dagewesene Möglichkeiten und Spielräume in der Formgestaltung. Kantenradien von 1–2 mm sind somit technisch machbar. Die neue Keramik ist deutlich härter und hat eine grössere Biegefestigkeit. LAUFEN produziert so dünnere keramisch Körper und reduziert damit das Gewicht sowie den Rohstoff- und Energieverbrauch. Die SaphirKeramik ersetzt keine der bestehenden Rezepturen, sondern erweitert das Spektrum der Ausdrucksformen des natürlichen Materials.

UNA RIVOLUZIONE NELLA FORMA
DELLA CERAMICA

UNE RÉVOLUTION DU LANGAGE FORMEL
DE LA CÉRAMIQUE

Towel rail 'Rail' 600 – transparent crystal

L'innovativa e pregiata ricetta di SaphirKeramik permette libertà d'azione e possibilità finora impensate di configurazione della ceramica. In questo modo diventa finalmente possibile dal punto di vista tecnico ottenere raggi di soli 1–2 mm.

Questo nuovo tipo di ceramica è notevolmente più duro, e possiede una maggiore resistenza alla flessione. In questo modo LAUFEN riesce a produrre corpi in ceramica più sottili, riducendone il peso e contribuendo a risparmiare il consumo di energia e di materie prime. SaphirKeramik non sostituisce le ricette esistenti, ma amplia la gamma delle forme espressive del materiale naturale.

La formulation innovante et de grande valeur de la SaphirKeramik offre des opportunités et marges d'un tout nouveau genre pour la conception des formes. Il est ainsi possible de réaliser des bords avec un rayon de 1 à 2 mm.

La nouvelle céramique est nettement plus dure et résistante à la flexion. LAUFEN produit ainsi des corps en céramique plus fins et réduit donc le poids ainsi que la consommation de matières premières et d'énergie. La SaphirKeramik ne remplace aucune des formulations existantes, mais complète les formes d'expression du matériau naturel.

S

SENTEC

Bathing in a Sentec cast mineral material tub feels like bathing in a natural pool. The surface feels smooth as a result of the high proportion of mineral particles. The innovative material also permits an amazing freedom of design: virtually any shape can be made – from very organic to very rectilinear, architectural shapes. Furthermore, the non-porous surface of the material is hygienic, durable, UV-resistant, very scratch-resistant and can be cleaned effortlessly.

Ein Bad in einer Badewanne aus dem Mineralgusswerkstoff Sentec fühlt sich an, als wäre man in einem natürlichen Becken. Durch den hohen Anteil an mineralischen Partikeln fühlt sich die Oberfläche glatt an. Das innovative Material ermöglicht ausserdem eine unglaubliche Gestaltungsfreiheit: Nahezu jede Form ist machbar – von sehr organischen bis zu sehr geradlinigen, architektonischen Formen. Darüber hinaus ist die nicht poröse Oberfläche des Materials hygienisch, langlebig, UV-beständig, sehr kratzfest und lässt sich mühelos reinigen.

Fare il bagno in una vasca da bagno realizzata in solid surface Sentec è come immergersi in una piscina naturale. Grazie all'elevata percentuale di particelle minerali, la superficie risulta particolarmente liscia. Questo innovativo materiale consente inoltre un'incredibile libertà di realizzazione: si può ottenere infatti pressoché qualsiasi forma, da quelle estremamente organiche fino a quelle architettoniche pulite e rettilinee. La superficie non porosa del materiale inoltre è igienica, durevole, resistente ai raggi UV, molto resistente ai graffi e si pulisce facilmente.

Prendre un bain dans une baignoire en solid surface Sentec procure la sensation d'être dans un bassin naturel. Du fait de la grande proportion de particules minérales, la surface est lisse au toucher. Ce matériau innovant offre en outre une liberté de conception incroyable: presque toutes les formes sont réalisables - des formes tout à fait organiques aux formes architectoniques très rectilignes. De plus, la surface non poreuse du matériau est hygiénique, durable et résistante aux ultraviolets, se raye très difficilement et se nettoie facilement.
