On the cover: Sofi

Imagine the future is an fascinating challenge. For over sixty years we have been constantly engaged in developing new innovations and promoting the protection of the environment, improving the efficiency of our product every day. We support the creativity of the best designers and architects, realising bathroom settings unique for their design and technological content.

Welcome.

Identity.

The Premium collections are dedicated to the market's top segment: worldwide, their style, elegance and efficiency represent Italian excellence in this sector. Working with the best of international designers and using cutting edge production technologies allow us to remove the gap between imagination and reality, giving life to collections with strong style identity and advanced special technological details.

Cutting edge.

Our commitment to the highest standards of quality means we are always one step ahead in the adoption of the most advanced technological resources, in the sustainability of the entire production process and in the ecological compatibility of our products. We adopt this philosophy in our development of each new model and, with our numerous innovations, we have radically influenced the technological evolution of the sector.

Efficiency.

Our world is one where technology is placed at the service of man, of the quality of life and of environmental sustainability. Dedicating resources to research and designing processes in view of production performance means maintaining 100% control of product quality, ensuring the highest capacity to express industrial processes fully respecting Italian style, culture and tradition.

Inspirations.

PLUS

Piet Billekens

The strength to revolutionise design, starting from technique: the perfection of the mark in its highest form. For over ten years it has been a design icon, the harmony of proportion and the sensuality of movement.

Perfection of the sign.

The perfection of the sign and the harmony of proportion: the bowl-shaped wash basin rises to be the highest expression of contemporary design.

Absolute minimalism is born from the revolutionary concept of coaxial technology: it removes the cartridge lock on the body's side, allowing to achieve an incredibly sleek profile.

Extreme minimalism.

The Plus bathtub thermostatic mixer is the highest expression of the design philosophy of the cylinder shape, which can be seen in all its elements.

Thermostatic technology allows the temperature of the flow to remain constant, even if there are sudden changes in the set temperature.

Expressive and iconic.

Water become an furnishing item thanks to the free-standing shower column, which can revolutionise the vision of the elements, and becoming the absolute protagonist of space.

Identifying itself with defined, timeless lines: the stylistic identity contained in all the parts outlines a refined, extremely elegant environment.

Multi-function bodyjet.

The ideal complement of the wellness setting; choose between a rain, massage or atomised jet, which can be adjusted in any direction with 30 degree angle.

By mixing air and water, it allows to enjoy the sensations of a Turkish bath using hot water and the refreshing mist effect using cold water.

Minimal wellness.

Linear and essential: the three-way, recessed thermostatic mixer makes the wellness experience sublime thanks to its marked, balanced nature.

The three ways of the system can be used independently: shower head with rainfall spray, four adjustable bodyjets and a shower set.

Essential detail.

Details provide the evidence: the Plus bathroom accessories express a refined philosophy in which attention to detail is an essential prerogative.

The wall-mounted towel rack is available in several sizes and shapes (traditional, with mounted soap dispenser, adjustable or extendable).

LIKID

Rodolfo Dordoni, Gordon Guillaumier

Likid redefines style standards. It expresses passion and dynamic spirit. The desire to create the best technology for water combines a unique and emotional design with a highly innovative project.

Puro design.

The absolute purity of the organic features that characterise Likid: inspired by the cone shape and available with all details is the pure essence of minimalism.

The refined style is the final result of a complex design project, aimed at creating a line which stands out for its complete lack of superfluous elements.

Total relaxation.

The Likid bathtub thermostatic mixer matches the sleek, modern features of the wash basin. Every part is dedicated to the highest cleanness of form.

Carefree wellness: thermostatic technology ensures complete comfort and the built-in hand shower and ergonomic control knobs improve the experience of using it all.

Vital energy.

The Likid thermostatic shower column is a source of intense sensations. Its formal minimalism adds energy and vitality to every moment spent under the shower.

The flow of water will immediately stop if there are sudden temperature changes, a hallmark of high comfort, the best way to fully enjoy the pleasure of water.

LIVE

Centro Stile

Every element is in perfect harmony in a mixer with a convincing design. In the Live collection, the absolute proportion of the parts frees itself from stylistic excesses and coherently follows the formal elegance of the cylinder.

Minimalistic elegance.

The Live wall-mounted wash basin mixer is available in four versions (with or without the wall panel and with spouts of two lengths, 150 or 200 millimetres).

Minimalistic elegance merges with technological innovation: the lever is blocked mid-run by a mechanical block that can reduce the mixer's consumption.

Timeless.

Linear and spindle-shaped, free from excesses and perfectly proportioned, Live's timeless shapes outlive fashion and express the soul of everlasting design.

The Live bathtub single control mixer is designed to remain always cool to the touch thanks to the hot water's shorter path in the body.

Less is more.

The lack of superfluous parts that does not fall into the banal: the nature of Live maintains its essence and shows rationality in all its elements.

Effective and reserved, the two-say, single-control, recessed mixer allows for simple diversion of the water from the nozzle to the shower set.

Top simplicity.

The flush fit shower mixer, combined with a water connection and wall rail, is the ideal composition to satisfy the need for wellness with utmost simplicity.

The metallic effect finish of the hose enhances the chrome plating of the mixer, while its smooth surface prevents the irritating twisting common to traditional hoses.

Balanced complicity.

Two-way wellness: as an expression of stylistic sophisticated consistency, the single-control recessed mixer with diverter marks an orderly, modern space.

The intense rainfall jet from the 300-millimetre diameter shower head combines with the delicate manual jet force, creating a total balance of sensations.

ACQUERELLI

Centro Stile

In Acquerelli, its dynamism is emphasised by the perfectly balanced minimalist line, a concrete reflection of the technological innovation contained in the compact, 28-millimetre Nobili Widd® 28 cartridge.

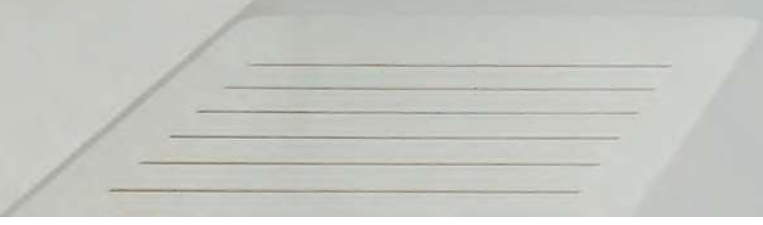

In splendid shape.

The dynamic nature of Acquerelli is emphasised by the essential style of this streamlined, flowing line that presents a surprising balance of proportions.

The bath tub with incorporated shower set is a tangible example of minimalism: there is no need to drill holes in the wall to hang the shower support.

A moderate balance.

A clean design that is not intrusive: the minimalist, current style of the shower surprises with its stylistically impeccable lines.

The 200-millimetre wide shower head with its anti-limescale system is an expression of sophisticated design and attention to daily comfort.

All to hand.

In perfect harmony between aesthetic taste and practicality, the hand shower housing in the mixer body is a summary of the encounter between design and ergonomics.

The practical diverter with automatic return allows the user to choose between directing the water to the shower head and the hand shower, with one simple gesture.

DRESS

Nilo Gioacchini

In domestic settings architecture and design express their identities in constant harmony. Dress is not limited to completing the furnishing - it evolves into a project with multiple customisation possibilities coordinating colour and matter.

Augmented reality.

By combining surfaces and materials as you wish, the endless creative faces of Dress allow to configure the entire collection according to the environment's style.

In this chrome and weathering steel version, the mixer directly involves the architectural space, intensifying reality and extending the industrial vintage spirit.

Artistic expression.

Individual and one-of-a-kind, Dress rises up to be pure artistic expression, creating an intense and evocative balance between atmosphere and matter.

The ample surfaces of the wash bowl basin's spout enhance the personal style of the mixer, highlighting the endless possibilities of the collection.

Overall architecture.

The unique personality of the collection is present in all possible variants: imagination is the limit, just like in a fantastic dream.

The Dress shower environment uses the 3-way flush fit thermostatic mixer, combined with a shower head with wall arm, four body jets and a single jet hand shower.

LOOP

Piet Billekens

When the best technology is applied to aesthetics, the result is extraordinary: the absolute design of the Loop collection pays homage to the technological efficiency from which it derives.

Natural waterfall.

In addition to the version with aerator jet, all the Loop wash basin mixers are available with a spectacular cascade spout, for a natural and organic flow.

The considerable visual impact, combined with the feelings born from the flow of water, provide pleasure like no other in the bathroom.

Wellness and harmony.

Intensely fragranced candles and fresh, blue water: the supreme pleasure of a relaxing bath brings out emotions each of us has always guarded.

The Loop deck-mounted tap crowns marvellous moments of pleasant tranquillity - the large aerator allows to fill the bathtub very rapidly.

Proportions in harmony.

The most sophisticated technology is hidden in what cannot be seen, the prerogative of a different product that expresses the best synthesis of practicality and design.

Practicality and pleasure are harmoniously combined in the new two-way, single-control recessed system, turning the bathtub into a true daily pleasure.

Wellness system.

The Loop shower environment transforms water into a wellness ritual through an essential and balanced designed: the body jets tone and massage your body.

Start the day with the right energy or finish it by eliminating stress by combining the shower elements as you wish you can bring an unlimited number of wellness solutions into existence.

Inborn elegance.

Loop interprets space in an elegant manner with several alternatives for the shower, all dedicated to current, sophisticated spaces.

The modern attraction of rounded edges found in the essential style of the two-way, single-control, recessed mixer.

Order and elegance.

The purity of Loop is also firmly expressed in the many available accessories, which can complete the bathroom with the best style coherence.

The hanger and the wall-mounted towel rack with a refined design extend the profiles of the mixers for a uniform environment.

LOOP E

Piet Billekens

Seductive trails of light. Intense sensations of almightiness. Its design inspires astonishing technological performance, illuminating the night with efficient intelligence. Its character is the passionate expression of ingenuity and research.

It lights up the night.

A gentle pressure applied to the control knob is all it takes to start the magic of electronic Loop, creating a special, enchanting atmosphere out of nothing.

The electronic system, fitted under the wash basin top, is invisible. If the mixer is not shut off, the water flow stops independently.

Advanced intelligence.

The solidity of matter makes way for the emotion of light as the temperature of the water flow changes, so does the colour of the light.

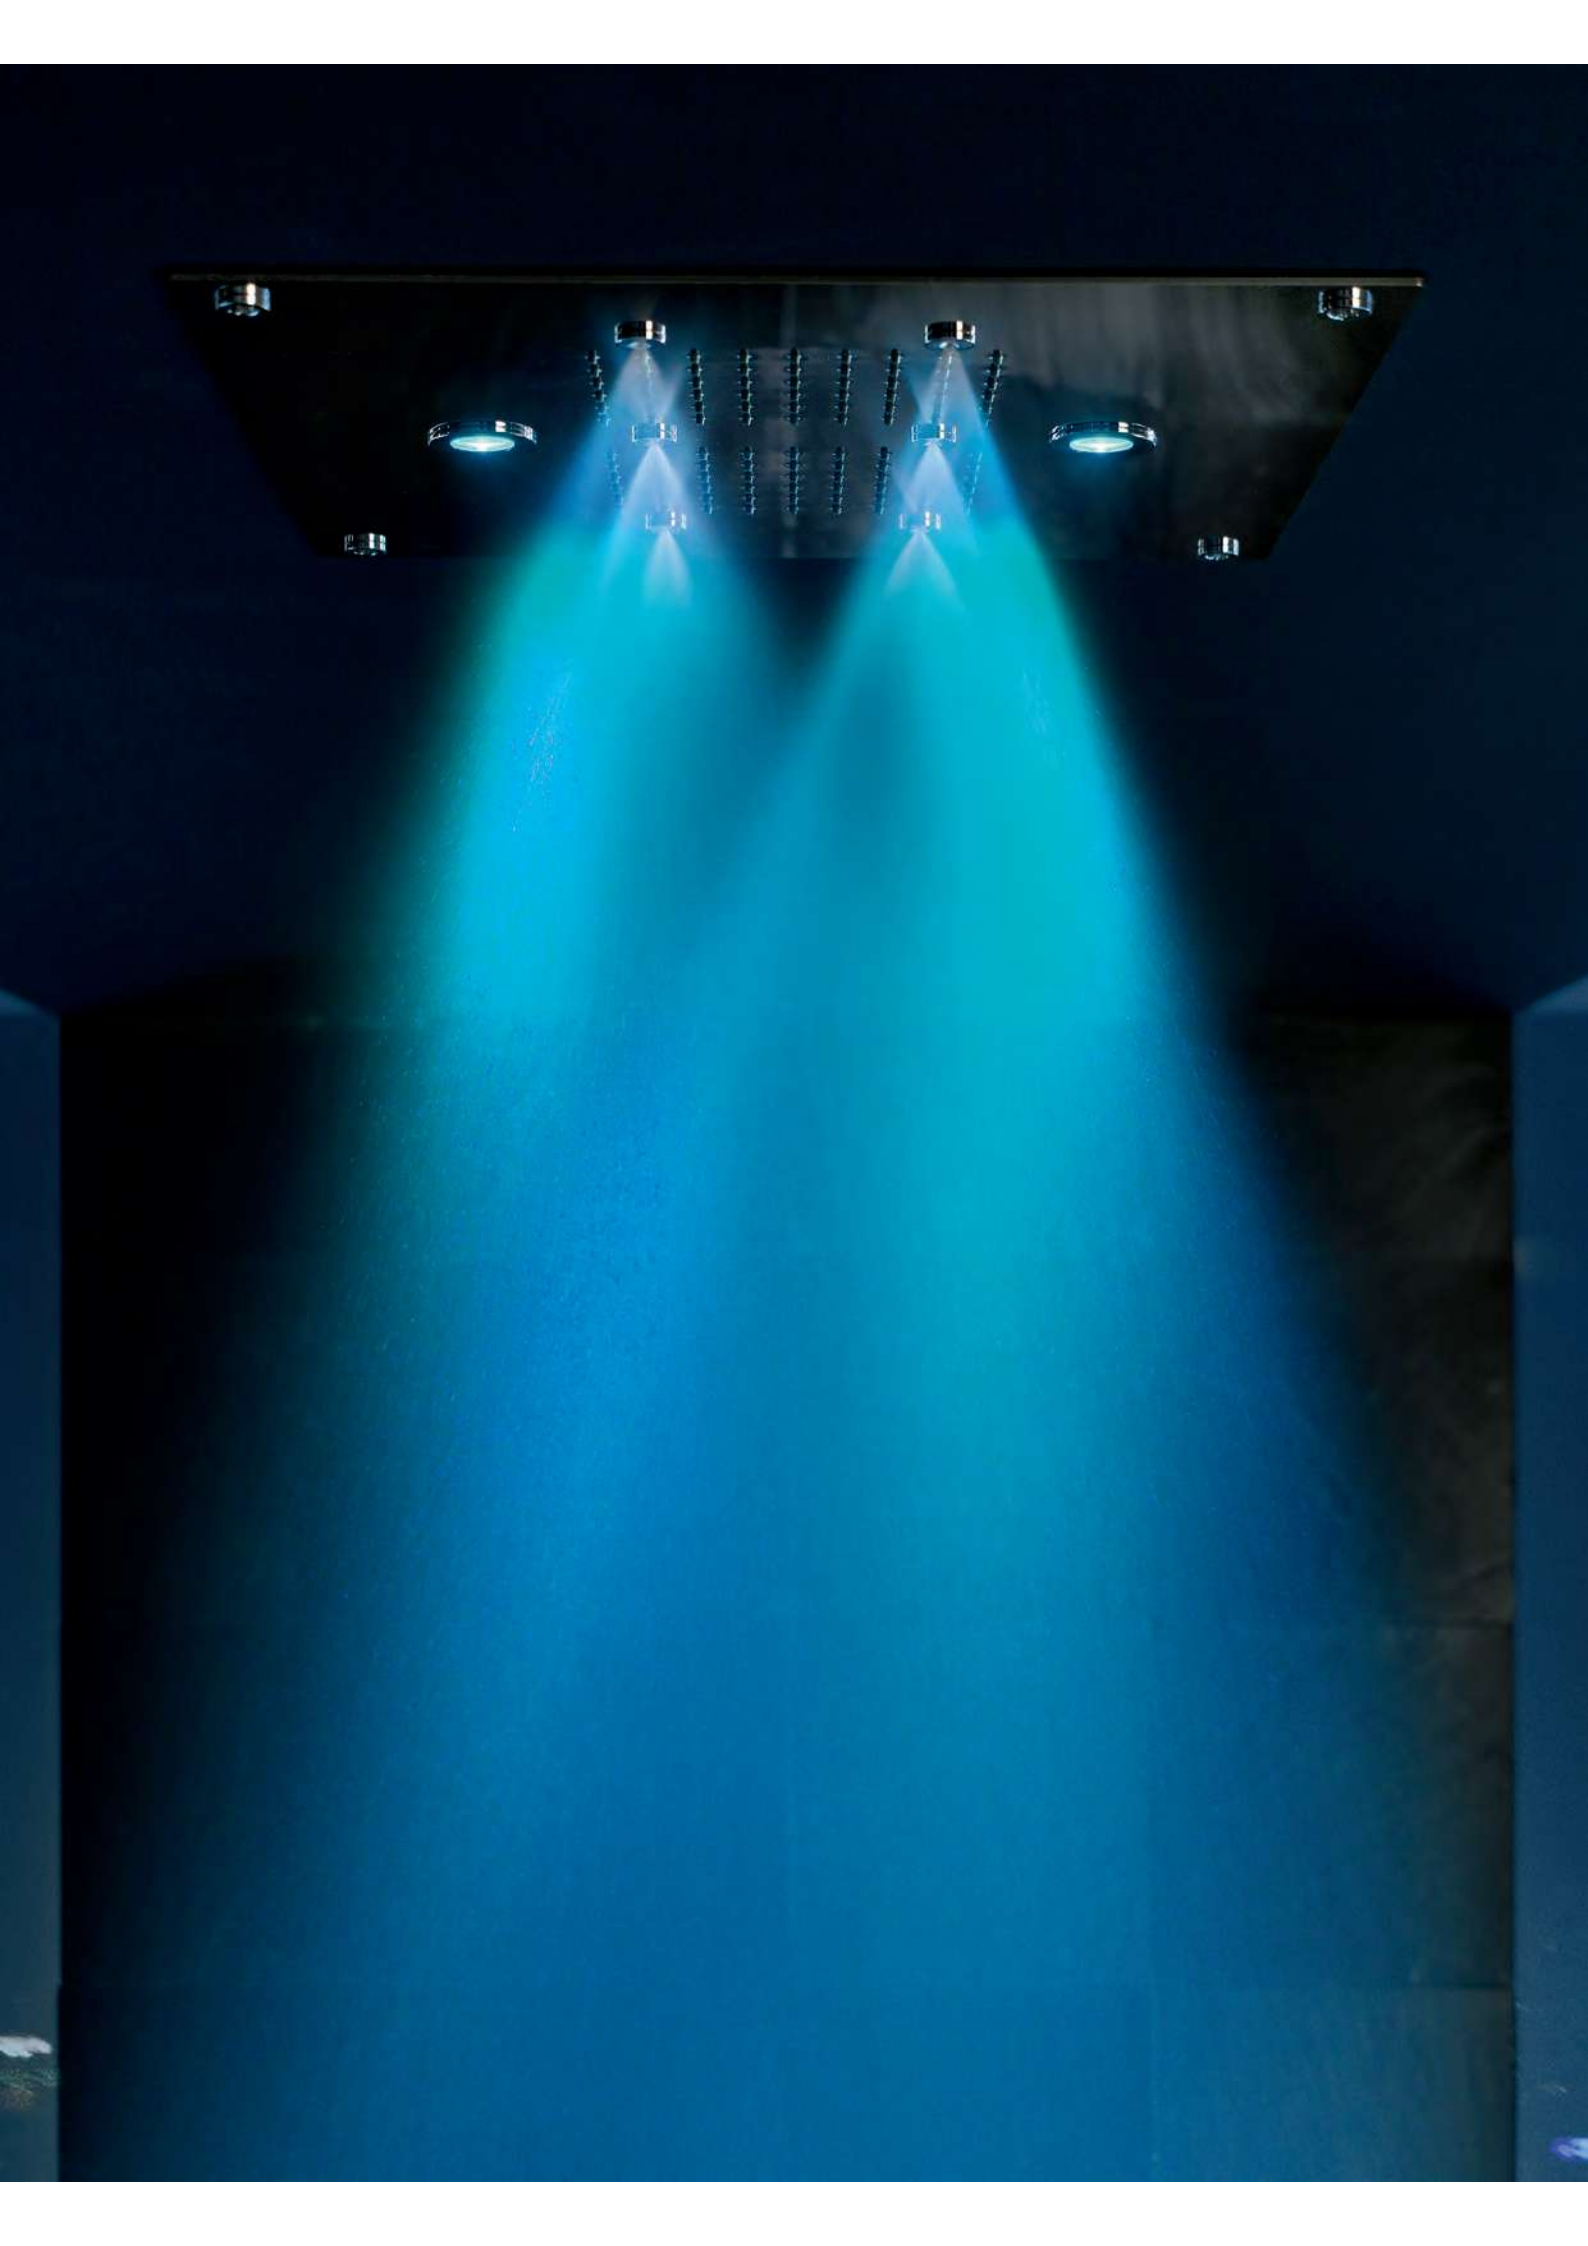

Advanced intelligence and protection of the environment: turning on the tap with cold water means the boiler does not switch on, thus no combustion fumes are released.

Thermostatic efficiency.

Incredibly easy to use in domestic and hotel settings - the system has three independent ways that are controlled through individual control knobs.

The rain jet and the atomised jet of the flush fit shower head can be used at the same time as the cascade jet of the spout on the bathtub edge.

Control panel.

Just the slightest touch of a button leads to countless different shades of colour merging with intense fragrances mixing with the gentleness of atomised water.

The control panel and the fragrance diffuser are combined with the flush fit shower head with two jets with aromatherapy and chromotherapy function.

All tidy.

The Loop E bathroom accessories underline the strong personality of the collection. Style coherence plays the starring role.

There are different models and sizes - the glass shelf and the wall-mounted towel holder meet the needs of architectural space with the utmost elegance.

ACQUAVIVA

Centro Stile

Geometric proportions and technical state of the art.
Acquaviva is celebrating the innovation obtained in over
sixty years of history with a modern, attractive style, straight
and balanced lines in all parts and from any viewpoint.

Order and balance.

Purity and harmony: the modern attraction of a fresh, contemporary line envelops an intense technological tradition, which has always been a part of the brand's DNA.

The innovative nature of the Nobili Widd® 28 cartridge can be tangibly seen in the use of the mixer, helping to save energy and water every day.

Broad-minded.

A complete collection inspired by the same conceptual philosophy: several types of mixer taps for sinks, bidets, bathtubs and showers.

The exclusive design is visible in the essential, sophisticated shape, thanks to the compact size of the mixer cartridge, just 28 millimetres in diameter.

Lively and practical.

Aesthetic research is expressed in a careful balance of proportions, where curves and corners balance each other and create a dynamic character.

The shower comes in different solutions: a free-standing shower column with thermostatic mixer, a single-control recessed shower, an external shower with riser rail.

UP

Centro Stile

Evasive lines, surprising stylistic strength. Fresh and youthful look, distinctive spirit. The Up collection speaks of enthusiasm and opens up new enchanting visions. Light body, dynamic character and innovative soul.

Extraordinary elegance.

The statuesque proportion of Up pays homage to Italian style tradition: every element is perfectly balanced inside a whole.

The dynamic flow limiter blocks the lever mid-run, helping save water: when the slight resistance is overcome, the mixer can allow the unlimited flow of water.

Statuesque balancing.

The harmony of the line of the wall-mounted Up mixer statuesquely characterises the whole bathroom. The ergonomics of the proportions reign supreme.

All the unnecessary fades from memory when looking at the gentle simplicity and the mild physiognomy of traits. Clearness and formal minimalism.

Always cool.

The Up single control mixer is designed to maintain a temperature that is never hot to the touch, which is particularly useful when there are children around.

The design takes on the shapes of a bowl-shaped wash basin, rotated at a right angle. This innovative concept can create style uniformity between two different products.

Individual wellness.

The shower environment can be configured according to personal taste. Lots of components, which can all be combined with one another, ensure perfect style coherence.

A 2-way system is the ideal solution for Up. The flush fit single control mixer controls the swivel shower head with rain jet and the hand shower.

Functional minimalism.

An innovative solution for the shower is the drain channel that completes the bathroom without being invasive. It is available with two variants, six styles and in five sizes.

Beautiful and intelligent, the pre-assembled, fixed and adjustable in every way (360°) syphon is inspectionable, the drain flow is no less than 30 litres per minute.

CUBE

Piet Billekens

The desire for perfection expresses its strong character in absolute purity. Exclusive stylistic icon, firm and elegant appearance. Absolute technological precision, manic care of production processes.

A matter of style.

The retractable Neoperi® Caché® aerator pays homage to the minimalist forms of Cube: it removes the cut on the spout, making the line extremely clear.

Machining from bar and the simultaneous polishing of the components allow to obtain a mixer with impeccable edges and perfect alignments.

Evocative personality.

The strict aesthetics of the wash basin are reflected in the bathtub single control mixer; the built-in hand shower combines extreme design with intelligent ergonomics.

The roundness of the mixing knob (as required by ergonomics) matches the sinuous shape of the spout and counterbalances the overall formal firmness.

Complete charm.

The Cube towel rack (available in different sizes), is ideal to complete the entire bathroom in the minimalistic, squared style of the collection.

Elegant, functional accessories, designed to match the shapes of the mixers, are the right choice if you want to create settings with a strong style content.

RAY

Centro Stile

Trust first impressions: Ray inspires the purity of formal minimalism. You will be enchanted by its elegance and excited by its presence. Robotised machining from bar produces an impeccable cutting-edge design.

NOBILIS

Sensual charm.

Firm shapes alternated with soft lines give Ray a special charm: the cascade jet spout attracts attention and enhances the seductive design of the mixer.

Research highlights style: the angulation of the cascade flow is calibrated to combine the visual pleasure of a natural water jet with the highest functional ergonomics.

Contrasting shapes.

In the bathtub single control mixer the net volume of the body counteracts the sensual lines of the spout, developing a style pattern with considerable aesthetic impact.

The Neoperl® aerator with rectangular section and cascade jet allows to fill the bathtub very quickly, reducing waiting times.

Wellness, squared.

Proportion, shape and balance: the pleasure of water is celebrated with elegance. The Ray shower environment carries refinement to its most intimate essence.

The two-way single control mixer conceals the Infinity universal flush fit body inside the wall, where it was installed when the water system was created.

Dedicated order.

The Ray bathroom accessories are the perfect elements for completing a uniform architectural project, combining minimalistic character with highest ergonomics.

Among the miscellaneous articles, the hanger is available in single version or in the functional triple edition, which makes it ideal for hanging more than one item at the same time.

MIA

Centro Stile

Precision and rigour. Aesthetic choices limited to the strictly necessary. Elegance and energy. Freshness and consistent proportions. Evident character, highest expression of timeless beauty.

Essential volumes.

The clear, squared design of Mia reawakens the senses through strict aesthetic choices: the pure, coherent balance among lines shows the mixer's essential soul.

A mixer with unmistakable aesthetic features, in which nothing is left to chance: the Neoperl® aerator with cascade jet maximises the firm nature of the lines.

Refined intelligence.

The Mia wall-mounted wash basin (available in two sizes) is precise geometric proportion. There is no interference in the clearness of the shapes and the extreme rigour of the lines.

The separate universal flush fit body allows to complete the system in the wall before choosing and installing the external part of the mixer.

Total purity.

The pure uncompromising style of the bathtub single control mixer is the expression of a current and refined design.

By placing the mixing knob on the left side, hot water spends less time in the body, so the surface is warm (but not hot) to the touch.

Clear and decisive.

Clear angles and harmonious coordination of space: the decisive nature of the Mia collection can also be seen in the rational style of the 2-way flush fit single-control mixer.

The system turns the moment of having a shower into a total experience, coordinating the large shower head and the hand shower.

Total care.

The shower syphon overlaps the cubic shapes of Mia, dealing with style even in less obvious details: no element is left to chance.

The covering plug can be removed so the syphon is fully inspectionable, which makes cleaning and maintenance operations in the shower easier.

Absolute coherence.

The firm lines required by the minimalist soul of Mia can be found in a number of accessories, which are ideal when playing at configuring the environment as you wish it to be.

The wall-mounted towel rack is the final accessory needed to complete the entire bathroom in the minimalistic, squared style of the collection.

TOWER

Centro Stile

Pleasure and seduction. The egocentric Tower collection attracts attention and focuses emotions. Extraordinary silhouette, highly creative fantasy, pure aesthetic taste. Marked elegance and unmistakable character.

Statuesque dynamism.

The interlocking of the body's and spout's diagonal volumes creates a silhouette with a highly emotional impact: Tower's dynamic nature emerges firmly from the minimalistic lines.

The retractable Neoperl® aerator contributes to the mixer's extreme philosophy: out of sight, it avoids cutting off the tip of the spout.

Glass and metal.

The Tower bathroom accessories firmly break the rules; here is a harmonious combination of different materials, frosted glass and shiny metal.

Wall-mounted glass holder and free-standing soap dispenser are useful accessories to keep a bathroom always tidy, adding impeccable style.

Extreme design.

The interlocking volumes of the bathtub thermostatic mixer create a firm, extreme style. The retractable Neoperl® aerator ideally connects the flow to the mixer.

Thermostatic technology increases mixing efficiency by immediately blocking the flow of water should there be sudden changes in the set temperature.

Suspended transparencies.

The Tower wall-mounted shelf, an elegant combination of frosted glass and chromed metal, helps keep the bathroom tidy with an original style and character.

The wall-mounted towel holder is available in different sizes, ranging between a compact, 42 cm version and an extra large 72 cm edition.

SOFÌ

Centro Stile

Majestic demeanour, formal style. Classic trend, refined elegance: Sofì reinvents history of art and proposes a fabulous meeting of distant tastes and modern inspirations inside the bathroom.

Goût parisien.

A continuous series of soft curves and sharp edges: Sofi brings the border of art and design closer, elegantly mixing cutting-edge elements with tradition.

The serious and majestic bearing of the single control wash basin reinvents classic criteria in a technologically advanced and stylistically innovative point of view.

A modern fairytale.

Like delicate waves, the curvy, elegant profiles of Sofi interpret the exclusive, timeless attraction of the three-part set for sinks.

The perfect elegance of the decorated plate with the indication "Chaud" and "Froid", lends prettiness and grace to the control knob.

Romantic arpeggi.

The bowl-shaped Sofi wash basin creates a pleasant romantic feeling, enhanced by the curves of the body and the undulating lines of the spout.

The Neoperl® Cascade® SLC® aerator makes maintenance operations easy: remove limescale deposits simply by slipping your fingers through it.

A white, multi-tiered chandelier with several lit candles, hanging from the ceiling.

A mannequin wearing a purple floral scarf and a yellow measuring tape, standing on a wooden stand.

A white clawfoot bathtub with a silver faucet and showerhead, set against a dark wall.

A wooden crate with text including: NEW YORK TIMES SQUARE, Rockefeller, 5th AVENUE, Greenwich Vill, LEXINGTON, CENTRAL PARK, Tribeca, 7th AVENUE, Broadway, 34, BROOKLYN BRIDGE, PARK AVE, ROOSEVELT, BRYANT PARK, Columbus Circle, Union Square, SOU.

A dark brown armchair with a blue patterned cushion and a dark brown cushion.

Several rolls of fabric or paper, some wrapped in white paper and others in brown paper, leaning against the wall.

Two rolls of fabric, one brown and one white, lying on the floor.

A large, patterned brown rug covering the floor.

Modern vintage.

The harmony of the lines of the wall-mounted wash basin stresses the artisanal detail of the mixer, creating continuous patterns among sinuous round elements and firm edges.

The package contains a second plate that reads "Hot and Cold" (in English), which is ideal for international bathrooms.

Sensual harmony.

The bathtub single control mixer in its most refined classic style. Sofi satisfies even the most demanding tastes without compromises.

The timeless and classic echoes of the mixer continue in the single jet hand shower, which has sensual shapes that match the collection's aesthetic harmony.

Unconditional elegance.

A high level of style in every component: Sofi shows its best side by lending beauty, elegance and sophistication to the shower area.

The three-way recessed thermostatic mixer is a consolidation of the lines, adding a refined, expressive style to the space overall.

Poetical charm.

The external shower mixer is a convenient alternative to the flush fit solution. When combined with the wall rail, it adjusts to very different settings thanks to its formal elegance.

The double-hem brass hose is more resistant than traditional versions. Its chrome-plated surface links perfectly to the brilliant and shiny tones of the mixer.

CARLOS PRIMERO

Piet Billekens

A perfect combination of classic and innovative elements:
Carlos Primero evokes timeless style suggestions,
reinterpreting in modern key the classical intuition of the
past years.

Suspended in time.

Carlos Primero reinvents the classic style of the dual control mixer, giving new life to free and immortal tastes guarded in the memory of the past.

Passion for innovation develops the technological evolution of the mixing knob, creating a line that is modern and nostalgic at the same time.

Solemn inspirations.

The Carlos Primero wall-mounted wash basin evokes timeless style suggestions, revealed in the precious decorations on the control knob.

The control knobs do not have fixing screws, which adds a touch of preciousness to their style. The large screw with clutched shaft ensures the highest reliability over time.

Recurring elements.

The details of Carlos Primero style charismatically fit into all the articles of this daring collection, making it immediately recognisable.

The design of the bathtub external unit (with deviator with control knob and fitted shower head support) fully represents the iconic style of the collection.

A model of sophistication.

Let yourself go and relax in the shower, in a moment suspended in infinity: a unique sensory experience that celebrates the balance between past and future.

The collection is completed with a comfortable, welcoming configuration: the recessed thermostatic mixer tap confirms its style in the handle detail.

Inspired elegance.

The elegance of the thermostatic shower column is asserted gently: its everlasting line is a reflection of a past seen through new eyes.

The alternation of vintage features and modern lines is one of Carlos Primero's key elements: the control knob is matched by the shower head and hand shower.

Overall view.

Coordinated accessories are a pleasure if you love style perfection; individual features are designed to create a unique and spectacular overall view.

The wall-mounted towel holder (available in different sizes and versions) is one of the possibilities to best express passion for style accuracy.

GRAZIA

Centro Stile

Interplay of contrasts in vintage style. Sensations of amiable tranquility. Peace and wellness of a distant past: Grazia brings back to life the appeal and charm of bygone days, mixing twentieth century style with technological innovation.

Classic without boundaries.

There are no excesses in Grazia's traditional elegance as a result of the delicate and exquisite line, which can be seen in its three-opening version as well.

The mixer knob hides the ceramic large screw. It is very reliable because it is made with materials and procedures that are not altered over time.

Sincere nostalgia.

The 20th century style brings to mind past ages and distant times: the unmistakable sincerity of the Grazia bathtub group enchants and leads to a timeless dimension.

The shower head support built into the mixer increases ergonomics and does not require drilling into the wall to install the support.

Without compromise.

Modern wellness and vintage taste: the Grazia shower environment is perfect if you are looking for a classic style without giving up the comforts of a multifunction shower.

The four-way flush fit thermostatic mixer controls the shower head with rain jet, two upper body jets and four lower body jets, wall rail with single jet hand shower.

Multifunction dream.

Be it an energetic rain jet or a delicate atomised jet, the bodyjets bring the sophisticated wellness of the oldest thermal spring centres into your home.

Turning the lever allows you to select rain jet, massage jet or atomised jet: all jets can be swivelled in every direction with a 30 degree angle.

RITZ

Centro Stile

Inspired by the refined elegance of a nostalgic taste, the Ritz collection generates natural sensations of tranquillity and inner peace. Formal balance, a strong sign of a design beyond time and trends, expresses a unique character.

Tradition and authenticity.

It is rare to behold the union between the highest expression of technology and the refined sensation of beauty. The refined style of Ritz is homage to tradition.

The passionate touch of the decorated control knobs stresses the love for detail: here are traditional inspirations for authentic, everlasting settings.

Vintage passion.

Elegant yet welcoming at the same time, Ritz expresses a unique character that embodies very recognisable features and extreme refinement.

The bathtub group with deviator and built-in hand shower is always appreciated and never out of fashion thanks to its classic, refined line.

Shabby chic.

The lived-in and elegant style of the environment coherently welcomes the Ritz shower composition, which includes stop knobs, deviator, shower head and hand shower.

Technology of details: the ceramic large screw allows the most gentle manoeuvrability in managing the flow and temperature of the water.

Exclusivity.

Special finishes.

Different personalities outlined by the perfect partnership of shape and undertone: the character of each collections can be intensified with a large range of special finishes. Elegant and austere tones leave room for elegantly refined hues, giving rise to highly exclusive atmospheres that interpret the most diverse personalities and style preferences, and reflect the overall furnishing design through a sophisticated balance of shades and volumes.

Exclusive icons.

On specific request, it is possible to add customised symbols and words on the mixers, such as hotel logos or icons that make a multi-way wellness system easier to use. It is also possible to create customised energy-saving and water-saving versions, with devices that can reduce the amount of water flowing or prevent accidentally causing a boiler to switch on, or equipped with anti-theft devices such as the self-locking aerator.
